Dr Punit Shah

Dr Shah graduated from the University of Manchester in 2000 with BSc [Hons] and BDS [Hons]. He gained his MFDS RCS [Edin] in 2003. After completion of vocational training, he worked in Restorative Dentistry posts at Leeds Dental Hospital and Guys, King's and St Thomas' Dental Institute. Punit has completed his 4-year Specialist Training at the renowned Guys, King's and St Thomas' Dental Institute and is now an accredited Specialist in Fixed and Removable Prosthodontics. His specialist interest is in the area of toothwear and implant dentistry.

Dr. Ali Abdellatif

Ali is a dedicated Implantologist and Oral Surgeon. He graduated with BDS in 1998 and obtained his MFDS RCS [Glasgow] in 2002. Ali has worked in the Oral and Maxillofacial Surgery Department at Basildon and Southend Hospitals and also at the Manchester Royal Infirmary. Ali has undertaken an extensive 2 year MSc Implant Dentistry course at the Guys, King's and St Thomas' Dental Institute.

Dr Conor Durack

Conor is an Endodontist. He graduated with BDS in 2001 from Cork, Ireland. He gained his MFDS RCS in 2007. At present, Conor is a Specialist Registrar at the Guys, King's and St Thomas' Dental Institute and is undergoing the 4-year MClintDent in Endodontics. He is also an active member of the British and European Endodontic Societies.

Dr Howard Moseley

Howard is our Orthodontist. He graduated from Leeds in 1985 and then completed specialist Orthodontic training in 1993. Howard was awarded the British Orthodontic Society Young Specialist Award in 1997 for clinical expertise. At present, Howard is also a Consultant Orthodontist at the Watford General Hospital and Eastman Dental Institute. With extensive experience in hospital and specialist practice, he is able to offer a comprehensive assessment and treatment service for both children and adults.

"Implant Study Evening: An Introduction"

Dental implants are now part of mainstream dentistry and will become integral to our treatment planning in any case where a tooth or teeth are lost. You, as a dental surgeon, have a responsibility to offer all treatment options, including implants, to your patients. This is especially relevant in light of the recent GDC guidelines. In addition, more and more of your patients will be aware of dental implants and will look to you to provide them. This presents you with an opportunity to build your practice, improve your patients' quality of life and develop your career within the dynamic field of implant dentistry.

There are many ways for you to become involved in dental implants:

- You can refer your patients to an experienced implant surgeon who will perform both the surgical and restorative treatment for your patients.
- Working closely with your referral surgeon and laboratory, you might choose to restore the implants yourself.
- Maybe you already have experience in restoring implants and now want to look into placing them yourself and would like the support of a Mentor.

This seminar will provide you with the opportunity to listen to an experienced implant surgeons and learn more about the benefits of implants for you and your patients.

Aim

To evaluate key factors influencing decisions of single tooth implant versus preserving natural teeth

Objectives

- To be able to identify suitable cases for implants
- To be able to understand treatment planning
- To be able to identify the most effective interventions for treating compromised teeth

Venue

Muswill Hill Golf Club, Rhodes Avenue, Wood Green, London. N22 7UT

Target group: All dental team

Course fee: Free of charge

CPD Points: 2.5 hours CPD
